

QA Documentation Packages (QADOC)

QADOC-1	Nuclear Grade document package primarily applicable to Pop-A-Plugs. Document package includes Certificate of Conformance, Certified Mill Test Reports (CMTR), independent test results of raw stock, pressure test report, and certificate from vendor providing annealing services.
QADOC-2	Commercial Grade with Certificate of Conformance and Certified Mill Test Reports (CMTR). A pressure test report can be provided at additional cost. Contact EST for CMTR's for other products.
QADOC-3	QA Document Package in accordance with EN 10204 2.1 (Certificate of Conformance). Document reviewed and signed by Authorized QA Representative.
QADOC-4	Commercial Grade with Certificate of Conformance and Certified Mill Test Reports (CMTR); however CMTR's may be typical examples, not necessarily exact heat code used. A product performance test may be included when required by the purchase order. The C of C provides reference to European standard EN 10204.
QADOC-5	Commercial Grade with Certificate of Conformance, Certified Material Test Report (CMTR), and Pressure Test Report. In accordance with referenced EN 10204, each CMTR is reviewed and signed by EST's Quality Representative.
QADOC-7	Includes QADOC-5 package with pressure test report in French.
QADOC-COC	Commercial Grade, Certificate of Conformance (C of C). This document can be provided for all products manufactured by EST Group.
