Did You Know?

The Liquid Natural Gas market is expected to reach peak demand in 2040.

- The LNG market is exploding with opportunities! There are a vast number of LNG projects going on in every region. Coordinate with your ASM to identify target opportunities.
- Onsite GripTight demos are the best way to win large project business – contact your ASM for LNG Plant & Project Reports from IIR.
- New plants being constructed to meet demand as supply currently short of demand, especially considering sanctions to Russia. Supply expected to meet demand early 2030's.

**LNG Market allows for full EST Group product offering
for newly constructed and in process plants**

New Build – GripTight Family of Plugs: A Plug for Every Application

- Complete hydrotest packages in less than 20% of time versus alternate methods
- Pressure testing during stick-built site construction – saves 85% of time required to test with welded end caps

Process Piping and Flange Replacement – Test & Isolation Plugs

- [ASME PCC-2 Article 503](#), identify achievable stresses and test type
- Work to eliminate Golden weld waiver – EST Group offers a plug to meet every specification

**Existing LNG plants are also prime targets for Pop-A-Plug due to
the large number of (Air-Cooled) Heat Exchangers in service**
