

## **DYK #11: Smart Ram (Cordless Pop-A-Plug Installation)**

**Did You Know...** that Curtiss-Wright has the only cordless smart plug installation tool on the market? As many of you are already aware, the Smart Ram 640T is a revolutionary step forward, redefining ease of Pop-A-Plug installation. Lightweight, portable, and robust, it eliminates trip hazards and the need for shop air! The existing hydraulic ram, the PAP6600-SIL, is still available for those who need an intrinsically safe installation tool, and we are also working on a brushless motor for the Smart Ram to address this.

No competitor can copy its “smart” technology – the digital readout and Bluetooth connectivity on our Smart Ram are patented. Attached are a few resources to aid you in arming our customers with the Smart Ram. We are also working on bringing out a Smart Tablet to accompany the Smart Ram for improved reporting, tracking, and plugging verification – stay tuned in the coming months.

**As always, stay hungry and happy hunting!**
