

DYK #12: Pop-A-Plug Assembly Robot

Did You Know... that we have a cutting-edge Pop-A-Plug Assembly Robot? In collaboration with Curtiss-Wright's Surface Technologies division, we here at EST Group have created a robotic assembly, measurement, and laser marking cell for our Pop-A-Plug product line. This industry-leading automated cell has expanded production capacity while providing in-line inspection and marking for each part. Some of the key benefits of this robot are:

- 100%-dimensional inspection added
- Increased quality inspection capabilities
- Increased throughput
- Replaces manual laser parts marking

Check out this great video demonstrating the robot in action:
